WORKSHOP ANNOUNCEMENT

Deulgaon Raja

Advanced Soil and Crop Health Management for **Chilli and Tomato** Seed Production

Organized By

Foundation for Advanced Training in Plant Breeding (ATPBR)

About the Workshop

Healthy soil and balanced crop nutrition are the foundation of high-quality vegetable seed production. This one-day intensive workshop is designed to provide practical, field-tested technologies for improving soil health, managing crop nutrition, and enhancing seed yield and quality. Participants will gain hands-on insights into modern, sustainable, and cost-effective approaches tailored for vegetable seed production especially for **Chilli and Tomato**.

Key Focus Areas

- Soil health assessment and improvement strategies
- Nutrient management for seed production in Chilli and tomato
- Integrated crop health management practices
- Role of bio-inputs and microbial solutions
- Managing soil-borne diseases and pests
- Enhancing seed quality, vigor, and productivity

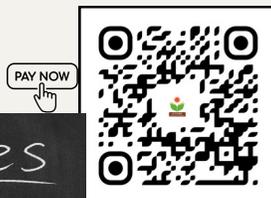

Who Should Attend

- Vegetable seed growers & contract seed producers
- Progressive farmers
- Agronomists & field officers
- Seed company professionals
- Students and extension professionals

Why Attend?

- Learn applied, practical technologies
- Improve soil fertility and crop performance
- Increase seed yield and quality
- Interact with experts and fellow practitioners

Fees

₹ Student, Public and Farmer : ₹2000/-
Professional : ₹3540/-
