

# Molecular Plant Breeding & Seed Industry

(April 28,29,30, 2021 (6.00 – 8.30 pm))

Three days online course is designed to help participants to understand the application of molecular plant breeding in seed industry such as DNA fingerprinting, Association mapping, Diversity Analysis, Hybrid purity testing and many more. Course comprises practical exercises, videos demonstrating and live discussion.

Trainer

**Dr. Narendra Kadoo**

Senior Principal Scientist

National Chemical Laboratory (NCL)
